# Here's to '49!

Financial authorities generally agree that the present active business will continue for at least several years to come. This is based not only on that vast amount of Government defense activity, but on continued shortage of many civilian needs and wants. This should clearly point to a continued active flower business. While some luxury items report a slight recession, this will not so easily happen to our business, that is more a necessity than a luxury. For instance, "a home is not complete" until it is planted. And, certain occasions are very incomplete without real flowers. And that always will be so if we do our part in making known the fact that cut flowers and plants contribute humidity and cheer to any living room, making them bodily and spiritual needs.

The policy of our business is based on promptly, courteously and fully replying to all communications. Also to get orders back in the mail the day they are received by us, as nearly as it is possible to do so. These are musts in the conduct of our business. Geo. J. Ball, Inc. takes pride in these policies, plus carrying the highest grade of seeds, plants and bulbs possible. My point is this: If it should happen that we unduly fail you in any of these policies, I want you to write me personally about it. You will do me a real favor in doing so. Also you'll contribute to the improvement of our service—a mutual benefit.

*Geo. J. Ball.*

## MONEY SAVING DISCOUNT!

On **seed orders only** (except Cyclamen and Lawn Grass) when payment is enclosed or on C.O.D.'s, you may subtract 5% on all orders from \$5.00 to \$25.00. On \$25.00 and over, deduct 8%.

For example: A \$30.00 seed order will actually cost you only \$27.60—a worthwhile saving. And for your files, an

itemized packing slip showing the total amount you've spent will be enclosed with your seed. This cash discount does not apply to Cuttings, Plants, Bulbs or Plant Bands unless quoted differently.

Payment should accompany all orders unless credit has been established. C.O.D. shipments 50% in advance.

**PLEASE NOTE!** Because a very large part of our entire year's seed business is experienced during January and early February, we sometimes find it impossible to get orders out as promptly as we would like at this season. Please help us to help you by sending us your order several days before you actually need your seed. After mid-February every order will again leave us the same day we receive it.

# All-Double

## Pan-American All-Doubles

(Pictured on Front Cover)

Picturing the cut flower possibilities of All-Double Petunias for retail growers.

(Petunias about 200,000 seeds per oz.)

Petunias have a universally popular appeal for bedding not possessed by any other plant. This is due to their brilliant colors and effectiveness in mass plantings, plus the comparative ease with which they flourish under a wide variation of soils and climates. In addition, large numbers are sold each year in combinations or as finished pot plants. Important points for the grower to remember are that a cool temperature and moderate use of water are essential if stocky, well-hardened plants are to be had. Equally important is the use of first class seed strains. Ours are among the world's finest.

\***Allegro.** Medium to large, fully double flowers of clear, bright salmon are carried on fairly dwarf plants. A new and attractive color in the All-Double class.

\***Caprice.** Medium sized, deep rose flowers are freely produced on bushy, compact plants of uniform habit.

\***Sonata.** Extra large, fully double, pure white flowers. Not as compact in growth as above two, and should be pinched to induce branching.

**Minuet.** Medium sized lavender. Tall; should be pinched.

**Nocturne.** Semi-double, deep Elk's Pride purple. The medium large flowers are borne on vigorous plants.

Prices above 5, each:  $\frac{1}{2}$  Tr. pkt., \$2.50; Tr. pkt., \$4.00;  $\frac{1}{128}$  oz., \$7.60;  $\frac{1}{64}$  oz., \$14.45.

**Glorious Mixture.** Contains both tall and dwarf types in all the above colors. In transplanting, be sure to use both large and small seedlings, thus insuring a complete range of colors.  $\frac{1}{2}$  Tr. pkt., \$2.00; Tr. pkt., \$3.50;  $\frac{1}{128}$  oz., \$6.65;  $\frac{1}{64}$  oz., \$12.60;  $\frac{1}{32}$  oz., \$24.00.

## NEW!—SEPARATE COLOR CANADIAN ALL-DOUBLES

**Rose of Canada.** Fully double, bright medium to deep rose flowers about 3 inches across are freely produced on compact bushy plants. Here's your chance to grow all the spring pot plants you need of the most popular color in Double Petunias.

**Northern Lights.** Includes a wide range of rose and pink shades, a few with white markings—no magenta. Ideal bushy pot plant habit with 3 inch, fully double flowers.

Prices above 2, each:  $\frac{1}{2}$  Tr. pkt., \$1.80; Tr. pkt., \$3.00;  $\frac{1}{128}$  oz., \$6.50;  $\frac{1}{64}$  oz., \$11.70.

## CALIFORNIA GIANT PETUNIAS

### \*BALL DWARF GIANT No. 1

We consider this the finest uniformly dwarf strain available. Produces over 80% extra large, open throated flowers ranging in color from velvety crimson to delicate pink; and is at its very best in a 3 or 4 inch pot. However, since dwarfness can be had only at some cost in vigor, this strain is not recommended for bedding.  $\frac{1}{2}$  Tr. pkt., 75c; Tr. pkt., \$1.25;  $\frac{1}{64}$  oz., \$2.50;  $\frac{1}{32}$  oz., \$4.50;  $\frac{1}{16}$  oz., \$8.00.

\***Ball Dwarf Giant No. 2.** Ramona Strain. More vigorous in growth than our No. 1 strain, therefore better suited for outdoor bedding work.  $\frac{1}{2}$  Tr. pkt., 60c; Tr. pkt., \$1.00;  $\frac{1}{64}$  oz., \$1.75;  $\frac{1}{32}$  oz., \$3.00;  $\frac{1}{16}$  oz., \$5.50.

**California Giants Mixture No. 5.** A very complete and attractive mixture of colors in the tall Giant class. Free flowering for outdoor bedding. Tr. pkt., 75c;  $\frac{1}{64}$  oz., \$1.35;  $\frac{1}{32}$  oz., \$2.50.

**California Giants—Supreme Florists' Strain.** Fine bedding mixture in soft shades of pink, rose and salmon. Tr. pkt., 75c;  $\frac{1}{64}$  oz., \$1.50;  $\frac{1}{32}$  oz., \$2.75;  $\frac{1}{16}$  oz., \$5.00.

\***Giant Rainbow Strain.** Outstanding for its unusual range of brilliant colors which we have found in no other mixture.  $\frac{1}{2}$  Tr. pkt., 60c; Tr. pkt., \$1.00;  $\frac{1}{64}$  oz., \$1.75;  $\frac{1}{32}$  oz., \$3.00;  $\frac{1}{16}$  oz., \$5.50.

### SEPARATE COLOR VARIETIES

\***Ball Lavender Giant.** A pleasing soft lavender with darker veins; dwarf growth.  $\frac{1}{2}$  Tr. pkt., 75c; Tr. pkt., \$1.25;  $\frac{1}{64}$  oz., \$2.40;  $\frac{1}{32}$  oz., \$4.40.

\***Copper Red, Dark.** Attractive deep coppery crimson. Tr. pkt., 75c;  $\frac{1}{64}$  oz., \$1.35;  $\frac{1}{32}$  oz., \$2.50.

\***Glamour.** A beautiful rich salmon rose, shading lighter toward the throat. Tr. pkt., 75c;  $\frac{1}{64}$  oz., \$2.00;  $\frac{1}{32}$  oz., \$3.75.

\***Irene.** Carmine red; white netted throat. Tr. pkt., 75c;  $\frac{1}{64}$  oz., \$1.50;  $\frac{1}{32}$  oz., \$2.50.

**Prince of Wuertemberg.** Deep reddish rose; dark throat. Tr. pkt., 75c;  $\frac{1}{64}$  oz., \$1.35;  $\frac{1}{32}$  oz., \$2.50.

**Princess of Wuertemberg.** Light rose pink; veined dark throat. Tr. pkt., 75c;  $\frac{1}{64}$  oz., \$1.35;  $\frac{1}{32}$  oz., \$2.50.

# Petunias

## Canadian All-Doubles

\***Canadian Mixture.** The excellent germination, rich coloring and uniformly dwarf but vigorous and free-branching habit of this fine Petunia, have been favorably commented on by growers everywhere. Tho not heavily fringed, the flowers are nicely ruffled and 100% double. Specimens the size of the one indicated in the photo at right are not uncommon when well grown. Rose, pink, salmon, white and mauve are represented in this fine mixture.  $\frac{1}{2}$  Tr. pkt., **\$1.80**; Tr. pkt., **\$3.00**;  $\frac{1}{128}$  oz., **\$6.50**;  $\frac{1}{64}$  oz., **\$11.70**.

\***America.** Freely produces medium sized carnation-flowered blooms of a pleasing deep rose color. If sown early and pinched hard a couple of times, very nice 4 in. pot plants can be had for that important spring business. In addition we find it quite valuable for bedding, our outdoor trials this past season flowering heavily until frost.  $\frac{1}{2}$  Tr. pkt., **\$1.25**; Tr. pkt., **\$2.00**;  $\frac{1}{64}$  oz., **\$6.50**;  $\frac{1}{32}$  oz., **\$11.70**.

**Colossal Shades of Rose.** The largest flowered All-Double Petunia, shades of pink and rosy mauve.  $\frac{1}{2}$  Tr. pkt., **\$1.50**; Tr. pkt., **\$2.50**;  $\frac{1}{128}$  oz., **\$5.00**;  $\frac{1}{64}$  oz., **\$9.00**.

## Victorious All-Doubles

(SOLD OUT—SHORT SEED CROP)

## GRANDIFLORA PETUNIAS

There are three distinct classes of Grandifloras: the Ruffled; the Regular Fringed; and the Dwarf Fringed. Like all Petunias, the most vigorous are the tall ones. The Dwarf Fringed make ideal pot plants, but for bedding most of them do not hold up in poor dry soil.

### RUFFLED GRANDIFLORAS

- \***White Queen.** Extra large, wavy pure white flowers and dwarf compact growth make this a truly outstanding Petunia. Fine for bedding or pot plant use. Tr. pkt., **75c**;  $\frac{1}{64}$  oz., **\$1.75**;  $\frac{1}{32}$  oz., **\$3.00**;  $\frac{1}{16}$  oz., **\$5.25**.
- \***Snowstorm.** Fine large flowered white. Similar to White Queen. Tr. pkt., **75c**;  $\frac{1}{64}$  oz., **\$1.75**;  $\frac{1}{32}$  oz., **\$3.00**;  $\frac{1}{16}$  oz., **\$5.25**.
- \***White Cloud.** Not quite as large flowered as the previous two varieties, but very free flowering. Tr. pkt., **75c**;  $\frac{1}{64}$  oz., **\$1.75**;  $\frac{1}{32}$  oz., **\$3.00**;  $\frac{1}{16}$  oz., **\$5.25**.

To help in figuring your seed needs, we indicate on various pages the number of seeds per ounce of important items. This is NOT an indication of number of plants to be expected. Because of varying conditions under which seed matures, germination under good conditions will run 60-70% or more; but don't figure too high.

Not hard to understand the tremendous popularity of All-Double Petunias when we stop to consider the possibilities in this versatile plant. Besides its pot plant and bedding value, it is useful as a short stemmed cut flower, and can be satisfactorily used in funeral arrangements. Flowers the size of the above unretouched photo are not at all uncommon in our Canadian All-Double Mixture when well grown.

- \***Elk's Pride Dwarf.** Our strain of this always-popular rich velvety purple variety is admirably suited for bedding or porch boxes. Uniform in growth and a ready seller. Tr. pkt., **50c**;  $\frac{1}{64}$  oz., **\$1.50**;  $\frac{1}{32}$  oz., **\$2.50**;  $\frac{1}{16}$  oz., **\$4.50**.
- \***Giant Flaming Velvet.** Large ruffled mahogany red flowers and fairly compact growth make this an attractive variety. Tr. pkt., **50c**;  $\frac{1}{64}$  oz., **\$1.40**;  $\frac{1}{32}$  oz., **\$2.50**.
- Burgundy.** Dark Burgundy wine red with large white throat. Well ruffled. Tr. pkt., **50c**;  $\frac{1}{64}$  oz., **\$1.00**;  $\frac{1}{32}$  oz., **\$1.75**.
- Dwarf Pink Glory.** Glowing carmine rose with white throat. About 60% true large flowered. Tr. pkt., **50c**;  $\frac{1}{64}$  oz., **\$1.25**;  $\frac{1}{32}$  oz., **\$2.25**.
- \***Ruffled Grandiflora Mixture.** Formula mixture of the finest varieties in the Ruffled class. Tr. pkt., **50c**;  $\frac{1}{64}$  oz., **\$1.00**;  $\frac{1}{32}$  oz., **\$1.75**;  $\frac{1}{16}$  oz., **\$3.00**.

(Grandiflora Petunias continued on next page.)

## GRANDIFLORAS—Continued

The medium sized, pure white, fringed flowers are produced in great profusion, and our outdoor trial showed them free of any objectionable lavender shading. A worthwhile new Petunia. Tr. pkt., **75c**;  $\frac{1}{64}$  oz., **\$1.75**;  $\frac{1}{32}$  oz., **\$3.00**.

Prices above 4, each: Tr. pkt., **50c**;  $\frac{1}{64}$  oz., **\$1.50**;  $\frac{1}{32}$  oz., **\$2.75**.

## DWARF HYBRIDA PETUNIAS

The Dwarf Hybrids are the most widely used class of Petunias. They adapt themselves readily to a wide range of growing conditions and are unexcelled as bedders or for combinations. They are especially suited to use by growers of flatted plants, and great numbers are sold this way each spring.

### BALL TEN BEST

These fine varieties constitute three-fourths of our demand for Dwarf Hybrid Petunias.

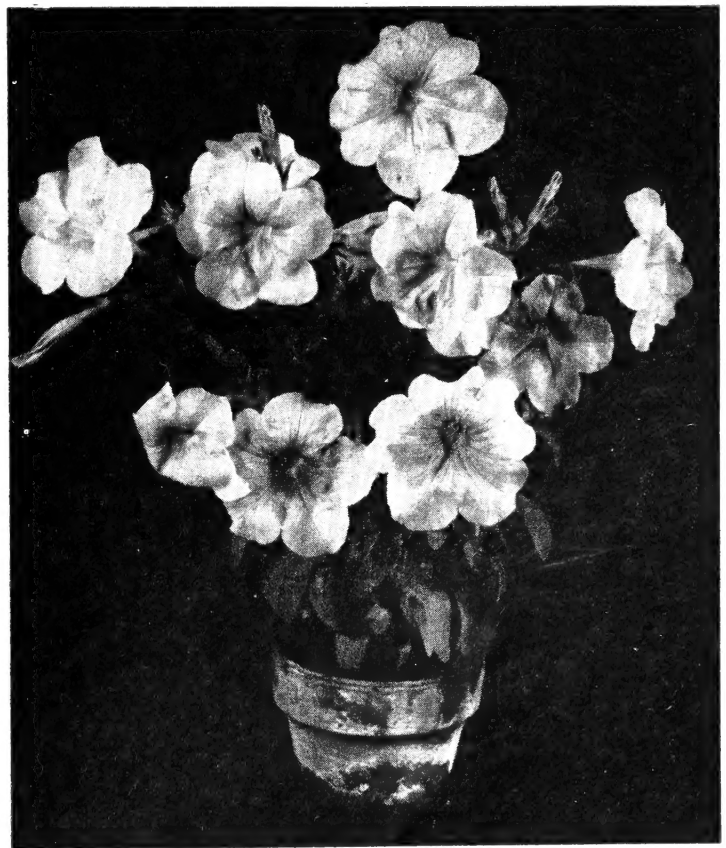

- \* **Admiral.** Our finest blue Petunia. Large attractively ruffled flowers with little violet shading—almost clear blue. Ideal for either pots or bedding. Tr. pkt., **75c**;  $\frac{1}{64}$  oz., **\$1.50**;  $\frac{1}{32}$  oz., **\$2.75**;  $\frac{1}{16}$  oz., **\$5.00**;  $\frac{1}{8}$  oz., **\$9.00**.

# Florists' Zinnias

(2500 to 4000 seeds per oz.)

## THERE'S MONEY IN ZINNIAS FOR EVERY RETAIL GROWER

If sheltered from the trying outdoor conditions of summer, Zinnias can be grown into attractive cutting material—particularly the Pompons or Lilliputs. Either a cloth or greenhouse can produce flowers that no outdoor stock will compete with. Such protection produces longer stems and larger flowers. While they are easily grown by sowing in the open as soon as the soil becomes well warmed, many gardeners prefer well started plants that are as easily produced under glass as any plants can be. Also, in our latitude, if sown outdoors as late as July, they will flower freely before frost. Zinnias are warm temperature plants; if the seed is sown in cold, wet soil, it will rot.

The development of Zinnias from the small, high centered singles of 50 years ago to the beautiful forms and colors of today has been almost a miracle. To maintain the trueness to type of today's stock requires much careful work. Most seed growers do this work well. Thru our annual trials of all varieties and personal inspection of seed fields, we are able to offer "All the Best—Nothing Else" in florists' Zinnias.

# Annual Larkspur

(8,000 seeds per oz.)

Larkspur, because of its bulk and weight, is essentially a locally grown crop and market growers of this item will have little competition from stock shipped any great distance. A January greenhouse sowing of Larkspur will flower about May, depending on temperatures. While it is sown outdoors to advantage in the fall, spring sowings do about as well if sown the first day the ground can be prepared. To draw up long stemmed flowers, use fairly enriched soil and water when quite dry. While the standard varieties are usually satisfactory, the finer quality of the new Improved Imperials and the Super Majestics will more than repay their extra initial cost.

## SUPER MAJESTICS

Extra vigorous growth with long stems and long spikes of fully double flowers are the important points about this new Larkspur strain. For outdoor growing, where older varieties have been rather short-stemmed, the additional length of this new class is a distinctive advantage. Equally valuable for greenhouse culture.

# Profitable Delphinium

(10,000 seeds per oz.)

## THREE FINE GIANT PACIFIC HYBRIDS

These three varieties are among the best Hybrid Delphinium on the market today and should be grown by every florist.

\***Galahad Series.** The finest clear white Delphinium. Huge, double flowers borne on long closely set spikes.

\***Guinevere Series.** Excellent, light pinkish-lavender with white bee.

\***Summer Skies Series.** Light blue with an attractively contrasting white bee.

**Prices** above 3, each: Tr. pkt., \$1.25; 1/8 oz., \$2.50; 1/4 oz., \$4.00; 1 oz., \$14.00.

There are two distinct types of Delphinium—the Hybrids, and what we might refer to as the Belladonna type. The latter are not so strong in growth or long stemmed as the Hybrids, but flower more freely. Decidedly the best Hybrids are the Giant Pacifics originated by Vetterle and Reinelt of California. They are available in a fine line of colors from light to the darkest blue, lavender, mauve and white. Nearly all come remarkably true to color considering their strong Hybrid origin, and they are quite resistant to mildew. Our own experience the past season indicates that all varieties will flower freely outdoors the first summer during August and September from a late January or early February sowing. The class known as Chinensis, usually grown as an annual, is not so vigorous as the above and rather short stemmed, but earlier flowering.

**Ball**

**WILT  
RESISTANT**

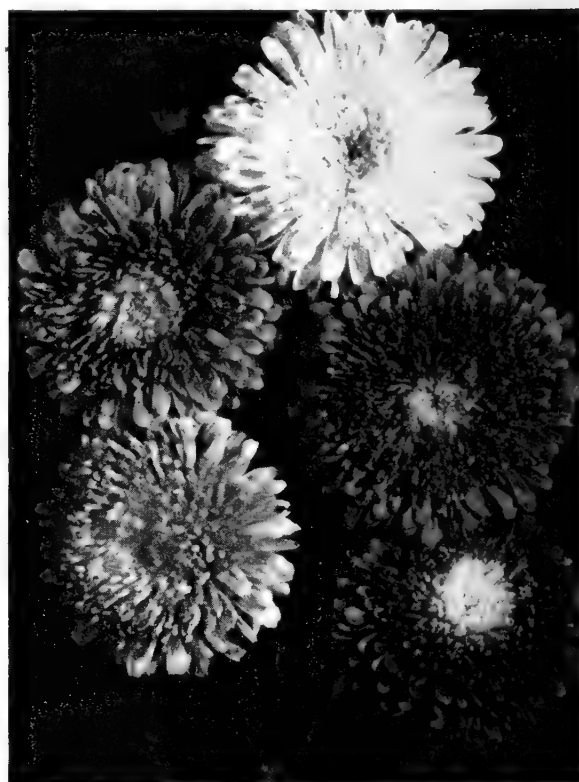

**Asters**

(12,000 seeds per oz.)

"Resistance" to Aster Wilt is only relative, and no grower should assume that "resistance" means the same thing as "immunity." While it is entirely true that these Asters have been bred to a high degree of resistance to the Wilt organisms existing in the originator's soil, there is considerable evidence to indicate similar but none-the-less different forms of Wilt may exist in other soils. The degree of resistance offered by these strains is therefore variable; however, there is no doubt but that they are far more satisfactory than non-resistant strains. Our past experience indicates that changing the location of the Aster planting regularly (or steam sterilizing), is a worthwhile safety precaution. We also try to minimize the number of transplanting checks by sowing a month before safe to plant out, then planting the seedlings direct to their permanent location. Our "Red Book" (50c) gives complete details on Aster culture as well as 150 other florists' crops.

# Profitable Marigolds

(10,000 seeds per oz.)

Modern plant breeders have almost done miracles with this old favorite. Today there are varieties which make excellent cut flowers (many without that characteristic Marigold odor), several that are outstanding as pot plants, or fit well into combination boxes—while nearly all the dwarf and medium types make a wonderful bedding show. Most Marigolds are easily flowered indoors in April and May from a January or February sowing. When grown under glass they must not be checked, especially by low temperature. This will result in buds being formed without sufficient growth.

## FIVE BEST FOR CUTTING

The following five varieties are the most popular cut flower kinds on our list and under average conditions we believe they represent the most profitable sorts to grow for this purpose.

\***Ball Giant Orange.** Similar in type to All Double Orange but somewhat larger flowered and of a more uniform deep, bright orange color. This, in our opinion, is the most profitable cut flower variety on the list. Tr. pkt., 35c; ¼ oz., 65c; 1 oz., \$2.00.

\***All Double Orange.** This belongs to the *Fistulosa* or large flowered, solid quilled-petal type. Produces nearly 100% double flowers, being preferred to Prince of Orange on this account. An excellent, long-stemmed cut flower strain.

\***All Double Lemon.** Identical to the above strain, but a clear lemon yellow.

\***Gold Improved.** The popular Carnation flowered intense orange with odorless foliage. Excellent for greenhouse forcing.

\***Yellow Supreme.** Similar to Gold Improved but with flowers a rich creamy yellow. Odorless foliage.

**Five Best Mixture.** Our own carefully compounded formula mixture of the above varieties balanced according to their commercial value.

Prices on above except Ball Giant Orange, each: Tr. pkt., 25c; ¼ oz., 50c; 1 oz., \$1.60; 4 oz., \$5.50.

## ODORLESS MARIGOLDS

For those who dislike the pungent odor of Marigold foliage these varieties will be found valuable. The following 4 are described elsewhere on this page:

\*Gold Improved

\*Golden Supreme

\*Yellow Supreme

Crown of Gold

\***Odorless Carnation Flowered Mixture.** Ranges in color from deep orange to light yellow. All are of the popular Carnation flowered type. Tr. pkt., 25c; ¼ oz., 50c; 1 oz., \$1.50; 4 oz., \$5.00.

\***Sunset Giants.** An extra large Carnation flowered strain. Long stemmed and the largest flowered variety we know of. Ranges from lemon to deep orange and is around 65 to 75% true to type. Tr. pkt., 25c; ¼ oz., 50c; 1 oz., \$1.75; 4 oz., \$5.50.

**Orange Sunset.** A bright orange selection from Sunset Giants. A first class variety. Tr. pkt., 25c; ¼ oz., 50c; 1 oz., \$1.75.

**Crown of Gold.** Small golden yellow crested flowers; odorless. Tr. pkt., 20c; ¼ oz., 40c; 1 oz., \$1.25.

# Greenhouse Forcing Snapdragons

Ball Snaps mean quality—always.

Growers shouldn't overlook the possibilities in a January sowing of Forcing Snaps for greenhouse flowering. If planted about 4 x 6 in. and grown single stemmed, a first class crop can be had for that late spring and early summer business. In addition many of the stronger growing greenhouse varieties are well suited for outside planting in localities where rust is not a factor. Not only are they earlier flowering than most of the Summer class, but the colors are much more complete and uniform. For this purpose sowing should be done about three months before time for planting out and plants carried along in pots or plant bands.

The ease with which good quality Non-Branching Stocks are grown, if soil has been properly sterilized, must not be overlooked. In the latitude of Chicago, seed may be sown until February 15 for early June flowering; later sowings usually result in more or less blindness. Note, however, that the season advances approximately one week for every 200 miles south—figure accordingly.

We issue a leaflet which treats in considerable detail the experience we have gained in growing this crop for the past 19 years. We'll gladly send you a copy for the asking.

# Popular Annuals For Bedding and Cutting

On this and the following pages thru page 39 we have grouped, in alphabetical order, all our valuable bedding and cut flower annuals except specialties on foregoing pages. Perennials will be found starting on page 40. In selecting these varieties, we keep in mind the interest of the professional or commercial grower only, thereby giving meaning to our business—"Flower Seeds for Florists."

To better enable you to judge the amount of seed you'll need for your planting requirements we have indicated the number of seeds per ounce of all important items listed. For example: **ACROCLINIUM**—8500 S means 8500 seeds per oz. These figures must NOT be accepted as indicating the number of plants to be expected. Under favorable germinating conditions most large seeds will germinate 60 to 70 percent.

The asterisk (\*) indicates varieties most dependably satisfactory in our experience and observation.

Years of patient breeding, together with almost daily roguing during the growing season, have developed a mixture that surpasses in brilliance and vigor that of any other we have seen anywhere. It's our monthly medium for suggesting timely sowing of essential crops, along with practical suggestions for growing them on. In addition it contains notes of general floricultural value. 8000 growers now receive it regularly **60c** per year; 2 years, **\$1.00**.

# You CAN Build Sales with Better Perennials

We recommend sowing perennials in spring. Germination will be better than during the heat of mid-summer and the larger plants produced will winter over more satisfactorily. We feel that every grower should include at least a few perennials in his outdoor planting. They get along admirably with little care, and many make really profitable cut flowers.

# Carnation Cuttings

With this thought foremost in our minds we have spared no effort to obtain the very best possible sources of supply for our Carnation cuttings. However, we cannot stress too strongly the importance of ordering early if you want real quality.

If your stock is disease infested or if you've been wanting to try several of those better new varieties, right now is the time to give us your order. We'll give it our very best attention.

**Minimum order 100 of a variety. 250 cuttings of a variety at the 1000 rate. Prices subject to change. Cuttings available from December thru March.**

## "FLOWER SEEDS FOR FLORISTS"

Here spread before you is an air view of our equipment to serve you. No similar business in "your land and mine" is better equipped than the above—few as well. From that new 8,000 sq. ft. modern warehouse, right foreground, to automatic heating, you'll find valuable efficiency equipment thruout. This directly helps us in caring for your business with us. One of our primary interests here is improvement of our seed specialties. Our long experience in this work is reflected in the great number of bettered varieties we've developed. This, as well as experimental work generally, is being actively enlarged upon. Our "Flower Seeds for Florists" business could not enjoy the advantages it does without that 21½ acres of greenhouses, and our long experience behind it. Our extensive outdoor annual trial ground gives us that vital information about varieties that, in your interest, we must have. Also that perfect method of shipping small plants thru our "Ball-Pak" is another example of better equipment. We use it exclusively in all our small plant shipments from West Chicago. And—those suggestions thru our little magazine, "GROWER TALKS"?

The foundation of this business was laid 60 years back by that visionary \$8.00 a month boy. 'Member him? Such are the opportunities in our free land where private enterprise and initiative are the ruling spirit.
